*The unit cost of capacity for the local wastewater system is \$2.6572 per gallon per day.			
The flow per Plumbing Fixture Unit (PFU) is stated as gallons per day based on the size of development and type of land use.			
Land use types that do not fit into the above categories will receive a default flow assignment based on the sample average.			
The default flow is 47.93 gal/day x \$2.6572 = a cost per PFU of \$127.36.			

A rate per PFU may be assigned by the City Engineer should a proposed use not be represented by one of the published SDC use codes and for which a default flow assignment is not representative of the proposed flow. In the case of those proposed developments that are determined to have a potential for exceptional water usage, the City Engineer may require that the Owner(s) enter into an agreement with the City to review water usage or wastewater discharge at such time the development is in full use or production as the final basis of the local wastewater SDC. A complete list of wastewater SDC/HUD BPR use codes is provided in Table 8.
