German 221 introduces you to East/West and united German culture and society from 1945 to the present. You will read or view a series of "love stories" that show changing notions about the connection between past and present, about guilt, identity, and the desire for fulfillment. Readings in political and cultural history will provide context for analyzing these ideas.

The course is taught in English. -- No knowledge of German required. GER 221 meets Arts and Letters and Multicultural IC requirements.
