

Reproduction, Larval Biology, and Recruitment of the Deep-Sea Benthos

EDITED BY

Craig M. Young and Kevin J. Eckelbarger

COLUMBIA UNIVERSITY PRESS NEW YORK

CONTENTS

<i>Preface</i>	ix
<i>Contributors</i>	xiii
ONE A Tale of Two Dogmas: The Early History of Deep-Sea Reproductive Biology	1
<i>Craig M. Young</i>	
TWO Cold-Water Echinoderms Break “Thorson’s Rule”	26
<i>John S. Pearse</i>	
THREE Adaptations for Reproduction Among Deep-Sea Benthic Molluscs: An Appraisal of the Existing Evidence	44
<i>Rudolf S. Scheltema</i>	
FOUR Molluscan Life History Traits at Deep-Sea Hydrothermal Vents and Cold Methane/Sulfide Seeps	76
<i>Richard G. Gustafson and Richard A. Lutz</i>	

vi Contents

FIVE Ontogenetic Migration and Dispersal of Deep-Sea Gastropod Larvae	98
<i>Phillipe Bouchet and Anders Warén</i>	
SIX The Relationship between Development Pattern and Species Diversity in Deep-Sea Prosobranch Snails	119
<i>Carol T. Stuart and Michael A. Rex</i>	
SEVEN Ultrastructural Features of Gonads and Gametes in Deep-Sea Invertebrates	137
<i>Kevin J. Eckelbarger</i>	
EIGHT Environmental Control of Quasi-Continuous and Seasonal Reproduction in Deep-Sea Benthic Invertebrates	158
<i>Paul A. Tyler, Lucia S. Campos-Creasy, and Lucy A. Giles</i>	
NINE The Biology of External Fertilization in Deep-Sea Echinoderms	179
<i>Craig M. Young</i>	
TEN Implications of Mesoscale Flows for Dispersal of Deep-Sea Larvae	201
<i>Lauren S. Mullineaux</i>	
ELEVEN Recruitment Ecology and Age Structure of Deep-Sea Invertebrate Populations	224
<i>John D. Gage</i>	
TWELVE Life History Studies of Deep-Sea Benthic Infauna: Poly- chaeta, Aplacophora, and Cumacea from the Continental Slope Off Massachusetts	244
<i>James A. Blake and Les Watling</i>	
THIRTEEN The Influence of Natural Organic Enhancement on Life Histories and Community Structure of Bathyal Polychaetes	261
<i>Lisa A. Levin, Gail R. Plaia, and Cynthia L. Huggett</i>	

FOURTEEN The Advantages of Dispersal in a Patchy Environment: Effects of Disturbance in a Cellular Automaton Model	284
<i>Ron J. Etter and Hal Caswell</i>	
FIFTEEN Ecological Patterns in the Deep-Sea Benthos: How Are They Related to Reproduction, Larval Biology, and Recruitment?	306
<i>J. Frederick Grassle</i>	
<i>Taxonomic Index</i>	315
<i>Author Index</i>	322
<i>Subject Index</i>	329
