In this workshop we will discuss the benefits of various types of exams as well as how to construct good true/false, multiple choice, short answer, and essay-type questions. Participants will practice writing questions and leave the workshop with a plan for constructing their next exam.

**Engaging Students in Self-Regulated Learning**

*Week 4: Wednesday, 2/1; 1:00-2:30pm, 51 PLC*  
**Facilitator:** Jason Schreiner, TEP  
**To register:** email jschrein@uoregon.edu

Self-regulated learning is the metacognitive skill and practice of strategically planning, monitoring, and evaluating one’s learning. Research tells us that incorporating just a few self-regulated learning activities and assignments into a course can improve students’ test performance, problem-solving skills, products, and attitudes about learning. This session will involve participants in designing many such activities for students — some meant for specific times during the term and others for specific learning experiences.

**Writing a Statement of Teaching Philosophy**

*Week 4: Thursday, 2/2; 1:00-2:00pm*

**To register:** email jschrein@uoregon.edu

A statement of teaching philosophy is a short narrative that explains your teaching strategies and goals in terms of your discipline and in the context of the teaching positions you have held and seek to hold. Teaching statements are an essential element of job applications for academic positions and for promotion and tenure review. This workshop will review formats and best practices for writing a statement of teaching philosophy. You will also begin the writing process and leave with a draft outline of a teaching statement. Graduate students or adjunct instructors who plan to apply for academic positions and newly-hired faculty in particular will benefit from this workshop.
