Preliminary Report of Committee on Credentials.

The Committee on Credentials begs to refer to the faculty the following questions, and asks for instructions before proceeding to make its final report:

1. The subjects presented for entrance do not coincide with those required by the catalogue. The schedules presented herewith will show that this is notably the case with the foreign language requirements. The arrangement prescribed courses in the college permits substitution of college electives for any preparatory language credits have been presented. The committee wishes to know if it has authority to substitute preparatory elective credits for language deficiencies.

2. Shall all entrance credits be strictly limited to 60, the maximum prescribed for admission? Shall all claims for college credits, based on work done in high schools, be referred to this or to another committee? How does the faculty wish the committee to adjust college credits?

3. The committee wishes to know if its conclusions are final with reference to entrance credits, or whether it is contemplated to keep each student's preparatory record open until he graduates. The committee's reason for asking this question is that it does not care to spend a great deal of time on difficult cases if the matter is to be reviewed subsequently.
