

In attendance:

Drix

Deborah Healy

Marc Schlossberg

Darren Wyss

- The purpose of the meeting was to begin the process of planning the data collection day.
- Darren and Marc had received two Ipaq PDA's and demonstrated how they will be used to collect data in the field.
- Questions about the capabilities of the mobile GIS program and the PDA's themselves were discussed.
- A tentative time schedule for the preparation of data collection day was established:

Sept 15 – Have survey designed

Oct 7 – WUN meeting presentation about project (large group)

Oct 15 – Operationalize (small group)

Oct 16 – Data collection day

- Discussions around the type of data to be collected ensued, with the consensus that brainstorming ideas and voting on them during a WUN meeting in the near future would be the most appropriate method of determining what data to collect.
